Notes: The Bush spending proposal is compared with the baseline spending level for FY2002 and 2011. The baseline employed is a per capita real baseline, meaning spending is adjusted for inflation (which varies by function) and population growth. A positive number is an increase over the baseline. A negative number is a "cut," or a reduction relative to the baseline. The inflation estimates are from the Congressional Budget Office. The population growth estimates are from the Census Bureau.
